Professional Summary

Motivated Frontend Developer with hands-on experience in building responsive and scalable web applications using React.js, JavaScript, HTML, and CSS. Strong understanding of component-based architecture, REST API integration, responsive UI development, and modern frontend development practices. Skilled in developing clean, reusable, and user-friendly interfaces with a focus on performance optimization and cross-browser compatibility. Quick learner with problem-solving abilities, collaborative mindset, and passion for software development.

Technical Skills

- **Frontend Technologies:** React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Component-Based Architecture, React Router
- **State Management:** Redux (Basic), React Hooks, Context API
- **Backend & APIs:** Python (Basic), REST API Integration, JSON Data Handling, Fetch API
- **Tools & Platforms:** Git, GitHub, VS Code, NPM, Chrome DevTools
- **Web Concepts:** Single Page Applications (SPA), API Integration, UI Performance Optimization, Cross-Browser Compatibility
- **UI / Design:** Responsive UI Development, Figma to UI Conversion

Projects

Personal Portfolio Website

[GitHub](#) | [Live Demo](#)

- Developed a responsive developer portfolio using React.js and reusable component architecture.
- Implemented client-side routing using React Router for smooth navigation.
- Created modular and reusable UI components for better scalability and maintainability.
- Optimized website responsiveness across desktop, tablet, and mobile devices.

- Improved UI performance and loading experience through structured component rendering.

Tech Stack: React.js, JavaScript, CSS, React Router

[Weather App - Real-Time Weather Web Application](#)

[GitHub](#) | [Live Demo](#)

- Built a weather web application that fetches and displays live weather information using REST APIs.
- Integrated third-party APIs to display temperature, humidity, wind speed, and weather conditions.
- Designed a clean and responsive user interface using modern CSS practices.
- Implemented dynamic search functionality based on city/location input.
- Enhanced user experience with responsive layouts and error handling.

Tech Stack: HTML, CSS, JavaScript, Fetch API
